

## Wedding Photography Price List 2010 / 2011

Every decision you make about your wedding must be made to ensure that you will have the very best memories of **your special day**. Your dress designer, florist, car supplier and cake maker all have a part in making this happen.

**But your photographer, more than any other will ensure the memories will never fade** by providing you with an album of beautiful images that will last a lifetime.

It is so important therefore to choose your photographer with care, an **established professional** with many years experience, a long standing **award winning** member of the Master Photographers Association, one who provides a **unique personal service** to each and every couple.

At **Moment in Time** we pride ourselves on all of the above and more and look forward to welcoming you to our studio to discuss your requirements and inspect our work which covers all styles from **elegant classical colour to reportage black and white**.

We offer a selection of **wedding albums** and **wedding books** with the option of single or multi image pages with or without overlays and a selection of covers including metal, leather and Perspex.  
We have a selection of **wedding photography packages** which can also be tailored to your exact requirements.
